**Enter the case serial number (Required):** 09/784,727

If not related to a patent application, please enter NA here.

**Class / Subclass(es)** 345/1.1, 1.2, 2.1; 725/75, 76, 77;**Earliest Priority Filing Date:** 2/15/01**Format preferred for results:**☒ Paper   ☐ Diskette   ☒ E-mail**Provide detailed information on your search topic:**

- In your own words, describe in detail the concepts or subjects you want us to search.
- Include synonyms, keywords, and acronyms. Define terms that have special meanings.
- **\*For Chemical Structure Searches Only\***  
Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers
- **\*For Sequence Searches Only\***  
Please include all pertinent information (parent, child, divisional, or issued patent)

numbers)

along with the appropriate serial number.

- Provide examples or give us relevant citations, authors, etc., if known.
- FAX or send the **abstract, pertinent claims** (not all of the claims), **drawings, or chemical structures** to your EIC or branch library.

**Enter your Search Topic Information below:**

This Application is directed to a seat-back display on an airplane wherein the passenger operates the seat-back display. The seat-back display includes an receiver to allow the passenger to down-load images from a digital camera to be viewed on the seat-back display.

A second independent claim includes a scanner with the seat-back display which allows a passenger to scan documents and view the documents.

Problem: This Application is directed a passengers being allowed to use the seat-back displays on an airplane. For example when passengers return home from vacation they would like to see pictures taken on the vacation, therefore this Application allows passengers to view their pictures by down-loading to the seat-back display. Second, business travelers often require scanners wherein scanners are difficult to use in an airplane due to the cramped quarters and portable scanners are often of low quality, therefore this Application adds an image scanner to the seat-back display of an airplane.

Terms: Seat-back display; (passenger w display); ((passenger or airplane) w entertainment w (display or center or system)); (passenger w (personal computer or computer)); (digital camera); (wireless transmit images or pictures); blue-tooth.

NOTE: Barring a 102 reference, what I need are references to cobble together a 103 rejection, directed to:

**Special Instructions and Other Comments:**

(For fastest service, let us know the best times to contact you, in case the searcher needs further clarification on your search.)

I need by Friday (March 21st if possible)

I will deliver other notes by hand, ASAP.

I will be in all week.

See NOTE above. I will probably be cobbling a rejection together using

**Press ALT + F, then P to print this screen for your own information.**
